**THE NATURAL VEG MEN** - Our relationship with these guys has evolved hugely over the last 2 years. We both started out around the same time as small businesses with similar ethics and ideas. These two are now firm friends and as well as supplying the area with their vegbox scheme they also grow solely for us as a restaurant having just moved to a larger site in Malpas (which is the oldest working organic field in England) This has now become our kitchen garden and we work together from the earliest stage choosing seeds and researching growing techniques.

**THE KNOTTED VINE** - A small scale wine supplier based in London who scour the wine world to find small independent growers with some cracking wine, also working closely with us to keep our wines in pairing with our menus and continuously bringing us new innovative ideas.
